Index of Contributors

Aldridge, J. F., 191–204
Anderson, M. A., 25–31
Antonarakis, S. E., 33–42, 95–107

Balazs, I., 85–94
Baro, D. J., 55–67
Bartsocas, C., 95–107
Bernstein, Y., 133–156
Brown, W. T., 69–83, 85–94

Chakravarti, A., 95–107
Cox, D. R., 157–168, 169–177
Cummings, M. R., 55–67

Dafni, N., 133–156
Danciger, E., 133–156
Davidson, J. N., 43–55
Devine, E. A., 69–83, 85–94
Drabkin, H., 109–120

Eisenberg, A., 85–94
Elroy-Stein, O., 133–156
Epstein, C. J., 157–168, 169–177
Epstein, L. B., 157–168
Erickson, J. M., 121–131

Faryniarz, A. G., 25–31
Fisher, S., 85–94

Garcia, M. J., 55–67
Gibbons, K. T., 25–31
Gonzalez, I. L., 121–131
Graham, G. J., 55–67
Groner, Y., 95–107, 133–156
Gusella, J. F., 25–31, 33–42, 95–107, 109–120

Hassold, T., 179–189
Healey, S. T., 25–31
Hobbs, W. J., 25–31
Houck, G. E., Jr., 69–83, 85–94

Jenkins, E. C., 69–83

Kazazian, H. H., Jr., 33–42, 95–107
Kitsiou, S., 95–107
Kittur, S. D., 95–107
Kumlin, E., 179–189
Kurnit, D. M., 191–204

Leppert, M., 179–189
Levanon, D., 133–156
Levitt, P., 239–246
Lieman-Hurwitz, J., 133–156

Manuelidis, L., 205–221
Matthysse, S., 191–204
Metaxotou, C., 95–107
Meyers, D. A., 95–107

Neve, R. L., 191–204
Niswander, L. A., 43–55
Nolin, S. L., 69–83

Oliver, M., 33–42

Patel, A. S., 95–107
Patterson, D., 109–120
Potter, M. J., 33–42

Rumsby, G., 43–55

Schmickel, R. D., 121–131
Schweber, M., 223–238
Scoggin, C., 109–120
Sherman, L., 133–156
Smith, G. F., vii–viii, 1–9
Stetten, G., 33–42

Takaesu, N., 179–189
Tanzi, R. E., 25–31
Trusko, S. P., 33–42

Van Keuren, M., 109–120

Warren, A. C., 95–107
Warren, S. T., 1–9
Watkins, P. C., 25–31, 33–42, 95–107, 109–120
Wong, C., 33–42

Young, B. D., 11–23

Subject Index

Acrocentric chromosomes, 55–65
Alzheimer's disease, 133
  causality, 225–227
  classification of, 223–224
  interrelationships between Down syndrome and, 229
  unitary genetic hypothesis for Down syndrome and, 223–236
Aneuploid conditions, molecular quantitation of, using chromosome 21 as a model, 85–94
Aneuploidy, human, origin of, 179–188
Assay, biological, for genes, 150–151

Biological assay for genes, 150–151
Biology of Down syndrome, 1–8
Brain development, relating molecular specificity to, 239–245

Causality
  Alzheimer's disease, 225–227
  Down syndrome, 227
Centromere movement, indications of, 205–220
Chromosomal DNA library construction, 19–20
Chromosome analysis by flow cytometry, 11–20
Chromosome fractionation, applications of, 16–30
Chromosome 21
  as model for molecular quantitation of aneuploid conditions, 85–94
  expression of genes on, 43–53
  gene locus encoding SOD 1, 133–151
  genetic linkage map for, 25–30
  probes, localization of, by *in situ* hybridization, 69–82
Chromosome 21q, linkage map on, 95–106
Chromosomes, human acrocentric, 55–65
Classification
  of Alzheimer's disease, 223–224
  of Down syndrome, 224
Cytometry, flow, human chromosome analysis by, 11–20

Dementia, problem of, in Down syndrome, 231–233

Fetuses, trisomy 16, phenotype of, 159–162
Flow cytometry, chromosome analysis by, 11–20
Flow karyotype analysis, 16–18

Gene locus encoding SOD 1, 133–151
Gene mapping
  comparative, of human chromosome 21 and mouse chromosome 16, 169–176
  using flow-sorted chromosomes, 18–19
Genes
  biological assay for, 150–151
  expression on chromosome 21, 43–53
  nucleolus organizing, 121–130
Genetic linkage map for chromosome 21, 25–30
Genetics of congential heart malformations, 191–203

Haplotypes, maternal age and, 105
Heart malformations, congenital, genetics of, 191–203

Immune competence, 7–8
In situ hybridization, localization of chromosome 21 probes by, 69–82
Interrelationships between Down Syn-

drome and Alzheimer's disease, 229–234

Karyotype analysis, 16–18

Leukemia, 6–7
Linkage map on chromosome 21q, 95–106

Mapping, *see* Gene mapping
Maternal age
  haplotypes and, 105
  nondisjunction and, 3–5
Molecular analysis
  of chromosome 21 using somatic cell hybrids, 109–116
  of Down syndrome, 1–3
Mouse trisomy 16, 157–166

Neural development
  abnormal, Down syndrome and, 244–245
  role of molecular diversity in, 242–243
  testing chemospecificity in, 243–244
Nondisjunction, 121, 227
  maternal age and, 3–5
  meiotic, 123–130
Nucleolus organizing genes, recombination and nondisjunction, 121–130

Phenotypes
  Down syndrome, molecular bases of, 5–6
  trisomic, comparison of human and mouse, 162–165
  trisomy in fetuses, 159–162

Ring chromosome 21, 33–42
Robertsonian translocation, 121–123

Somatic cell hybrids, molecular analysis of chromosome 21 using, 109–116

Trisomy 21, 169–170
  human, animal model of, 157–166

Unitary genetic hypothesis for Alzheimer's disease and Down syndrome, 223–236

Volume 450
June 28, 1985

MOLECULAR STRUCTURE OF THE NUMBER 21 CHROMOSOME AND DOWN SYNDROME[a]

Editor and Conference Organizer
GEORGE F. SMITH

CONTENTS

Preface. *By* GEORGE F. SMITH vii

The Biology of Down Syndrome. *By* GEORGE F. SMITH and STEPHEN T. WARREN 1

Human Chromosome Analysis by Flow Cytometry. *By* BRYAN D. YOUNG .. 11

Genetic Linkage Map for Chromosome 21. *By* JAMES F. GUSELLA, RUDOLPH E. TANZI, PAUL C. WATKINS, KERIN T. GIBBONS, WENDY J. HOBBS, ANNE G. FARYNIARZ, STEVEN T. HEALEY, and MARY ANNE ANDERSON 25

Ring Chromosome 21: Characterization of DNA Sequences at Sites of Breakage and Reunion. *By* HAIG H. KAZAZIAN, JR., STYLIANOS E. ANTONARAKIS, CORINNE WONG, STEPHEN P. TRUSKO, GAIL STETTEN, MARK OLIVER, MICHAEL J. POTTER, JAMES F. GUSELLA, and PAUL C. WATKINS 33

Expression of Genes on Human Chromosome 21. *By* JEFFREY N. DAVIDSON, GILLIAN RUMSBY, and LEE A. NISWANDER 43

Molecular Organization in the Proximal Region of Human Acrocentric Chromosomes. *By* GEOFFREY J. GRAHAM, DEBORAH J. BARO, MARK J. GARCIA, and MICHAEL R. CUMMINGS 55

Localization of Chromosome 21 Probes by *in Situ* Hybridization. *By* W. TED BROWN, EVELYN A. DEVINE, SARAH L. NOLIN, GEORGE E. HOUCK, JR., and EDMUND C. JENKINS 69

Molecular Quantitation of Aneuploid Conditions Using Chromosome 21 as a Model. *By* EVELYN A. DEVINE, W. TED BROWN, GEORGE E. HOUCK, JR., STUART FISHER, IVAN BALAZS, and ARTHUR EISENBERG 85

Linkage Map on Chromosome 21q and the Association of a DNA Haplotype with a Propensity to Nondisjunction and Trisomy 21. *By* STYLIANOS E. ANTONARAKIS, SMITA D. KITTUR, CATERINA METAXOTOU, CHRISTOS BARTSOCAS, SOPHIA KITSIOU, PAUL C. WATKINS, ACHYUT S. PATEL, ANDREW C. WARREN, JAMES F. GUSELLA, YORAM GRONER, ARAVINDA CHAKRAVARTI, DEBORAH A. MEYERS, and HAIG H. KAZAZIAN, JR. 95

[a] This volume, National Down Syndrome Society Symposium No. 1, is the result of a conference entitled Molecular Structure of the Number 21 Chromosome and Down Syndrome, which was held in New York, New York on November 15 and 16, 1984 under the sponsorship of the National Down Syndrome Society.

Molecular Analysis of Chromosome 21 Using Somatic Cell Hybrids. *By* DAVID PATTERSON, MARGARET VAN KEUREN, HARRY DRABKIN, PAUL WATKINS, JAMES GUSELLA, and CHARLES SCOGGIN 109

Nucleolus Organizing Genes on Chromosome 21: Recombination and Nondisjunction. *By* ROY D. SCHMICKEL, IRIS LAUDIEN GONZALEZ, and JEANNE M. ERICKSON 121

Molecular Structure and Expression of the Gene Locus on Chromosome 21 Encoding the Cu/Zn Superoxide Dismutase and Its Relevance to Down Syndrome. *By* YORAM GRONER, JUDY LIEMAN-HURWITZ, NAOMI DAFNI, LEVANA SHERMAN, DITSA LEVANON, YAEL BERNSTEIN, EFRAT DANCIGER, and ORNA ELROY-STEIN 133

Mouse Trisomy 16: An Animal Model of Human Trisomy 21 (Down Syndrome). *By* CHARLES J. EPSTEIN, DAVID R. COX, and LOIS B. EPSTEIN ... 157

Comparative Gene Mapping of Human Chromosome 21 and Mouse Chromosome 16. *By* DAVID R. COX and CHARLES J. EPSTEIN 169

Use of Restriction Fragment Length Polymorphisms to Study the Origin of Human Aneuploidy. *By* TERRY HASSOLD, ERIKA KUMLIN, NORMA TAKAESU, and MARK LEPPERT 179

Genetics of Congenital Heart Malformations: A Stochastic Model. *By* DAVID M. KURNIT, JOHN F. ALDRIDGE, RACHAEL L. NEVE, and STEVEN MATTHYSSE 191

Indications of Centromere Movement during Interphase and Differentiation. *By* LAURA MANUELIDIS 205

A Possible Unitary Genetic Hypothesis for Alzheimer's Disease and Down Syndrome. *By* MIRIAM SCHWEBER 223

Relating Molecular Specificity to Normal and Abnormal Brain Development. *By* PAT LEVITT 239
